Topic 1: AI Romantic Partners

1. AI romantic partners exhibit obvious gender stereotypes. Where do these biases actually come from?

Please analyze their causes from the perspective of the four types of AI bias (human bias, data bias, algorithmic bias, and model deployment bias).

2. Would you consider having a romantic relationship with an AI partner?
Can AI romantic partners ultimately replace real-life partners? Why?

Topic 2: AI Digital Afterlife & "Cyber-Resurrection"

1. Do you think we should use AI to “bring back” deceased loved ones (such as family members or partners)?

Would this help people cope with grief, or make it harder for them to accept reality?

2. If companies charge for AI “revival” services (e.g., through monthly subscriptions), do you think this is a legitimate service, or an exploitation of people’s grief?

AI-Generated Fake Content

Topic 3: AI-Generated Fake Content

1. If a deepfake video of you is spread online and causes serious damage to your reputation, even if it is later proven to be fake, do you think the impact can ever be fully undone?

2. When AI-generated misinformation causes serious harm, who should bear responsibility, and to what extent?

AI model developers? False content creator? Platforms that disseminate such content? People who forward it? Users who believe the content?
