

CUHK (SZ)
Course Outline

1. Course Identity

A. Course as listed in CUHK (SZ)

The information in this block should be exactly as approved by the CUHK Senate. In case there are any differences, please explain in the table below.

Course code	DAI1000
Course title (English)	Digital and AI Literacy
Course title (Chinese)	人工智能与数字素养
Units	1
Language of Instruction	English
Description (English)	This course provides a comprehensive introduction to Information Technology (IT) and Artificial Intelligence (AI), equipping students with essential know-how for the AI era. Students will explore key IT applications and laws, recent developments of AI, cybersecurity, and the societal implications of AI. Hands-on practices will focus on real-world use cases, empowering students to adapt to rapidly evolving innovations in IT and AI.
Description (Chinese)	本课程全面介绍信息技术和人工智能的最新进展，为学生提供适应人工智能时代所需的核心知识。学生将学习现代信息技术及重要定律、人工智能的最新进展、信息安全以及人工智能的社会影响。课程还将通过实践练习，聚焦于现实案例，帮助学生适应信息技术和人工智能领域的快速发展。

B. Corresponding course in CUHK

Please give details of the *closest* corresponding course in CUHK (as approved by the CUHK Senate and listed in the course list). If the course in SZ maps to more than one course in CUHK, please make multiple copies of the block below.

Course code	ENGG1003 & ENGG1004
Course title (English)	Digital Literacy and Computational Thinking
Course title (Chinese)	數碼素養及計算思維
Units	3
Description (English)	This is an introductory level course on digital literacy and its applications. The course first covers basic information technology skills and spreadsheet usage. Then basic statistics and data science concepts for working with data from digital sources will be introduced. Computational thinking techniques for solving problems with data (e.g., automation, textual analysis, data visualization, etc.) will

	be covered. Demonstrations on solving real-life problems creatively will be provided. Case studies in social media usage will be included to illustrate how to interpret data properly and identify false information. The course focuses on hands-on practices using relevant software toolboxes, without covering the inner-working details.
Description (Chinese)	

2. **Prerequisites / Co-requisites**

Please state prerequisites and co-requisites, in terms of courses in CUHK (SZ)* or any other requirements (e.g., having taken certain subjects in high school).

(* Because course codes may not yet be stable, please provide both course code and course title.)

A. **Prerequisites**

Null

B. **Co-requisites**

Null

3. **Learning Outcomes**

The course aims to help students:

1. understand how different information technologies and AI change our lifestyle and impact societal development (KV)
2. develop a lifelong learning ability in information technologies and AI (KV)
3. develop a good usage pattern on how to securely handle and manage digital devices and information (KSV)
4. acquire an understanding and appreciation of various relevant ethical, legal, and cultural issues in the AI era (KV)
5. develop skills in data manipulation, analysis, and visualization (KS)
6. develop skills in using AI tools to solve practical issues (KS)

(K=Knowledge outcomes; S=Skills outcomes; V=Values and attitudes outcomes)

4. **Course syllabus**

Students will learn three major topics:

- Foundations of information technology
- Core concepts, techniques, and application in AI
- Social, ethical, and security aspects of the digital and AI age

5. **Assessment Scheme**

Component	Weight
Participation	10%
Tutorials	20%

Midterm Examination	35%
Final Examination	35%
Total	100%

6. Grade descriptor

Grade	Description
DISTINCTION	Exceptional performance in all aspects of the course. Demonstrates a deep understanding of how IT and AI technologies transform lifestyles and impact societal development. Shows a strong ability to acquire new knowledge and skills independently. Proficient in using the Internet with excellent etiquette and capable of implementing basic and advanced cybersecurity measures while staying vigilant against threats. Exhibits solid knowledge of information management, ethical principles, and local and international legal and cultural standards. Displays outstanding communication skills, teamwork, and a commitment to leveraging IT and AI responsibly and effectively.
PASS	Good performance in all aspects of the course. Demonstrates a satisfactory understanding of how IT and AI technologies influence lifestyles and societal development. Shows the ability to acquire new knowledge and skills independently. Proficient in using the Internet with acceptable etiquette and capable of implementing basic cybersecurity measures. Possesses adequate knowledge of information management, ethical standards, and local and international legal and cultural norms. Displays good communication skills and a cooperative teamwork spirit.
FAIL	Performance does not meet the minimum requirements of the course's assessment tasks.

7. Feedback for evaluation

Students will have an opportunity to evaluate the course and lecturer at the end of the semester.

8. Reading

A. Required (ISBN is compulsory for required reading)

TBD

B. Recommended

TBD

9. Course components

Activity	Hours/week
----------	------------

Lecture	1
---------	---

10. Indicative teaching plan

Week	Lecture Content
1	Course Overview
2	Information Technology Developments
3	AI and Technology Convergence
4	Machine Learning Essentials I
5	Machine Learning Essentials II
6	Generative AI and Creative Applications
7	Midterm Assessment
8	Embodied AI and AI Agents
9	AI Agent Practice
10	AI and Cybersecurity
11	AI Ethics and Social Impacts
12	AI Limitation and Trend Discussion
13	Wrap up
14	Final Assessment

11. Implementation plan (Academic Year & Term)

60 students for lecture

12. Approval (For Office Use)

13. Academic Honesty

Attention is drawn to University policy and regulations on honesty in academic work, and to the disciplinary guidelines and procedures applicable to breaches of such policy and regulations. Details may be found at

<https://registry.cuhk.edu.cn/en/page/30>

With each assignment, students will be required to submit a signed declaration that they are aware of these policies, regulations, guidelines and procedures. For group projects, all students of the same group should be asked to sign on the declaration.

Only the final version of the assignment should be submitted via VeriGuide.

[Teachers could add more detailed instruction/requirement regarding academic honesty].

14. Any other information

15. Version date

Version number	2
As of (date)	December 4, 2025
